

Information

- [WebNLG Challenge 2020](#)
- Github repository
- Working-Pipeline defined
- Data downloaded and pre-processed regarding WebNLG recommendations

Questions

- How to parse Test xml file into .triple_
- For 2017th version, we do not have reference text for test (*evaluation*): Automatic Evaluation for WebNLG Challenge 2017. Alternatively, we could use [version 2](#), which is solved but benchmark is not provided.
- Introduction to [Fairseq](#):
 - `tokenizer.perl` from [mosesdecoder](#).
 - BPE
- Evaluation
 - Which BLEU script is recommended:
 - [SacreBLEU](#)
 - [BLEU](#) from NLTK
 - [Maluuba metrics](#) for NLG
 - metrics used for [E2E Challenge](#)
 - Alternatives to download [METEOR](#) and [TER](#)
